

## Do you want to reduce your energy bills and make savings of 35k year on year?

This 500 pupil Boarding school did and commissioned CRC to undertake a full energy survey and project manage the recommendations to achieve a target reduction of 15% on oil consumption at the school.

### How we did it:

1. We conducted a full energy survey across the school estate and identified saving areas to reduce heating oil usage by 15%
2. Sourced Boiler control BM system
3. Compiled report and agreed recommendations with Bursar
4. Conducted a free boiler survey on all plant rooms and identified 3 test sites
5. Set up 1 month Free trial test in January 2016 - February 2016 to achieve 15% savings
6. Test delivered 13.75% with an annual saving of £25k
7. Set up 5 year Finance plan at less than £1k per month with **no upfront** costs.

### What we achieved, the figures:

Actual savings on oil consumption review based on invoiced usage Year on Year 2016 to 2017

7/4/2015 - 26/2/2016	=	599,107 Litres
11/4/2016 - 28/2/2017	=	514,140 Litres
TOTAL SAVINGS	=	85,000 Litres
TARGET SAVINGS %	=	13.78%
ACTUAL SAVINGS%	=	14.18%

Prices as of February 2017 @ .4140 per litre equates to savings of £35k per year.

### What's the catch? No catch, just benefits...

Substantial Provable Savings

Free Trial Test

Free installation

No immediate purchase of capital equipment

No large upfront costs

Equipment pays for itself from savings generated
