

Queen Anne's School, Reading

Upgrade to LED Lighting 2021

Over 1300 LEDs installed across the school

“ I would highly recommend the Light as a Service contract we have entered into with the help of CRC (The Cost Reduction Company).
We managed to install the best quality lighting (Phillips) throughout the main part of the school, without any capital outlay up front. The savings from the electricity and maintenance cover the cost of the contract and we will have no maintenance or replacement costs for our lighting going forward.
The reaction from our staff and pupils to the improvement in lighting has been very positive and it has helped us reduce our carbon footprint straight away, which is a great contribution towards our aim of being a more eco aware school.
I would highly recommend you have a look. ”

Ed Hellings, Bursar at Queen Anne's School
